Brandon Conover he is my brother and he is sixteen. It is all about my brother and when he gets his stitches. And how he dose it and where he dose it to.

Well it all started when my brother was 8 years old and me and his friends were playing tag on the wood pile and it was not very stable at the time and we did it. So my dad was watching us and then my brother got it and he started running and fell and landed on an AX.

Then I did not know what happened then Matt Closland said he is bleeding all over the place then I seen my dad and he was running towards us and asked what happened and I said I don't know. Because I did not see it and then they took him to the hospitle so he could get stitches and go home and he got about 42 stitches.

Well the second time he got stitches was when we were at Lake Powell and we were knee boarding and he was doing good and then he quit then it was my tern and I went and fell off after About 12 Minuets. Then it was his tern and he was doing good and then he reacted. There was blood every were and so we took him to get the doctor to get stitches . Then I had to hold the boat for two hours.
