

Vee Brasher Guymon

I was born on my parent's farm in Huntington Canyon. I have 2 older sisters and 1 older brother. We lived on the farm until I was 4 years old. We moved to Huntington in 1950. I attended Huntington Elementary School, North Emery Junior High and High School, and Emery County High School. I finished high school early and started attending Carbon College, majoring in accounting, in 1963. I have worked outside the home most of my married life. I worked at Carbon Emery Bank (Zions Bank) from 1964 until 1976. In 1981 I began working for Emery County School District in food service. This job allowed me to be home when my children were home. I retired from managing the school lunch program at Huntington Elementary in 2017. I married Courtney Guymon in 1963. We lived our lives in Huntington. Courtney and I have 6 children, 3 boys and 3 girls. Conrad owns an engineering company in Orem and lives in Orem. Chris is a mechanic at the Hunter Power Plant and lives in Huntington. Celena lives in Fairview and works for MKJ Construction. Cari teaches school in Castle Dale and lives in Huntington. Charlene works for Emery County in the Treasurer's office and lives in Elmo. Craig lives on the family farm South of Huntington and is the Shop Supervisor for UDOT in Price. We have 16 grandchildren and 3 great grandchildren. I am going to be a grandmother again to a grandson in September and another great grandson in August. I have worked in various organizations in The Church of Jesus Christ of Latter-Day Saints. The last 20 years I have taught primary. Courtney and I were ordinance workers in the Manti Temple until it closed in October 2021 for repairs. Courtney passed away two weeks after our last shift. I spend my time gardening, working in the yard, quilting, sewing, embroidering, crocheting, freeze drying and canning the fruit and vegetables I grow. My daughter Cari lives with me, and we both enjoy working in our yard. I keep records for my son Craig's farming and ranching operation. He raises Gelbvieh and Balancer bulls. I help as much as I can with the actual cattle handling, AI, vaccinating, branding, etc. I love spring when the calves are born. Courtney and I and our family spent a lot of enjoyable years farming and raising beef cattle.
