

I choose to interview my Great Aunt Dima. She is my grandpa's sister which would be my moms dad. She has dark brown hair. She is around 5'6" tall. She lives in Lawrence Utah.

Aunt: Dima hurt I am Jennie's great aunt her mother is my niece by my second brother I was born to Milo B Jensen and Mildred C Winder. Milo was born in Lawrence Utah. Mildred was born in desert lake. I was born the first child in 1934 I have two brother which one is Jennie's grandfather.

Where did you grow up?

I grew up here were I live now. I was born two miles away from here. I have lived here most of my life. I have only spent about two years of my life away from the Huntington area. I lived twelve years in Huntington and then I moved back to pretty much my birth place. I really would not like to live anywhere else. I have taken and lived in price when I was married to my first husband. I lived in Huntington and organ when I married my second husband then I came home to Lawrence to spend the rest of my life. I have a nice place anyways I think it is nice. I love the outdoors I used to have animals. Jennie says i have to talk about my self growing up. Well we used to have a porcupine which we had in a match box like the one you carry when you go camping it is only about six inch box by about 4 inches wide and two inches deep. We had that fellow in that for a long long time. But

anyways we used to feed him bread. He used to stand up on his hind legs and beg. Eh eh eh he would say. And he was the cuties thing. Once in a while we would tease him and he would ruffle up his fur which if u got to looken close it was a little bit of fur but it was mostly needles one day we teases him to much and he got mad and started to flippen around and we got some quills from his tail in our legs and we still thought it was funny and he was the cuties thing we had ever had. I love our desert we live in. I love to go rock hunting. Usually in the summer time is when I like to go best because it is hot here in Lawrence but you go down there on the desert and it seems to be a different kind of heat. But when you go out there and start walking you can loose your self for hours and hours at a time. Just walken around looken kicken the rocks taken and looken for the wild Indian potato's and the wild garlic. Some times you can kick some out of the ground and they are more or less good eatin but you got to like the dirt to be able to eat them. I love also to go fishing that is my whole summers enjoyment. I know jennie should like to go fishen cause her mom used to like to go fishen and her dad did too. But I think they are kind of involved in other things now.

Jennie: Where did you go to school at?

Aunt: I went to school in Huntington we used to have an old school where the Elementary school is now. I spent my six years there. And then

when I got into high school which was when I was in 7<sup>th</sup> grade we crossed the street and went over where the mine office building is and there is where I went to high school. But of course like all smart girls I decided I didn't need to go to school so I quit shortly after I started tenth grade. Got married immediately I started a family every two to three years I had a child until I ended up with four of them. And then I decided boy enough of this. So I decided I had enough children. But they also went to the elementary school and they also went to high school up in till my oldest one was in the 9<sup>th</sup> grade then I believe we had the high school over in castle dale and then they had to go over there when they got out of grade school. Some of my kids I believe my last one went to canyon view I believe it is there in Huntington on the road going up the Huntington canyon. I believe she went there. No I haven't been too far away from home lived in organ for a year in a half. I have live in Denver Colorado for three months. I've lived in Nevada for three months. I have lived in elly Nevada about a year. Other than that that is my wonderings so no I am kind of a home body I like home. We have lots of stuff around here you can go fishing or hunting I love to hunt. But I wasn't to good at getting my deer. But anyways hunting was fun.
